Isolated acetabular revision with retention of well-fixed femoral stem account for about 27% of all revision THR [1, 2]. If UOC standard 12/14 (5˚) femoral head taper could not compatible with the trunnion of retained prosthesis, Revision Femoral Head offers additional 4 taper options, including 10/12, 11/13, 12/14 (3˚), and 14/16, to cover the majority of existing femoral stem. Revision Femoral Head are fully compatible with U-Motion II acetabular system and cemented Full XPE Cup if cup revision is necessary.

### Order Information

#### Standard 12/14 (5°) Femoral Head
